Safe Work Procedure:
<ol style="list-style-type: none"> 1 Document the daily inspection of the equipment in the pre start up book 2 The safety of persons involved in installing, operating or maintaining the equipment can be affected by many factors. Some of the factors that can affect the safety of the workplace are: <ul style="list-style-type: none"> The location and configuration of the equipment The type of equipment used The attachment of additional or optional equipment Alterations or modifications The type of materials being processed Operation of equipment by unqualified personnel 3 Based on these factors, additional guarding or other precautions may be necessary to comply with the rules and regulations 4 Mount and dismount the equipment using steps, ladders, handrails and walkways. Use the 3 point contact rule 5 Do not refuel the equipment with the engine running. All sparks and open flames must be kept a min of 50 ft from the equipment when refueling 6 Be aware of your actions and the actions of other people & equipment on the job site at all times 7 Shut down and lock out power source before opening electrical cabinets 8 Do not use electrical boxes as storage cabinets 9 Do not disengage power cable quick disconnects while cables are energized 10 Report defective equipment or unsafe conditions to your supervisor immediately 11 Keep platforms, steps & walkways and all other job site areas clear of obstructions, tools & other items 12 Repair fuel leaks immediately, & clean up residual fluid, lubricant or spillage at once

If an emergency situation occurs while conducting this task, or there is an equipment malfunction, engage the emergency stop and follow the lock out procedure

REPORT ANY HAZARDOUS SITUATIONS TO YOUR SUPERVISOR
