Safe Job Procedure

Job: Disc Sander

Developed By: Ahmed Raza Syed
Approved By: Paul Meseyton
Received BY : Don Unger

Date: June 30,2008
Date: June 30,2008
Date: June30,2008

Equipment Required: Sander machine, grinding disc

PPE Required : Safety Boots, Proper Gloves, Safety Glasses with shields
Respirator or Dust Mask, Hearing Protection and Hard hat

Job Step:

- 1- Read and understand manual and safety instructions. If you have any question And not comfortable, Pl. ask the supervisor for demonstration / clarification
- 2- Wear proper PPE required
- 3- Do not expose o rain or use in damp location
- 4- Visually check the condition of instrument and working / surrounding area For any potential hazard
- 5- Plug the Sander into outlet; turn the switch on Allow Sander to get operating speed. Do not use excessive force this damage the piece /load If sanding small parts, use pliers or vice to hold the part/ piece rather than finger. Hold the piece with good grip on it all the time
- 6- Do not combine sanding material like wood and metal. This could cause explosion or fire hazard.
- 7- When job finished, stop the tool by releasing lever trigger and return to proper storage place. Do the house keeping for potential hazard.
