

Safe Work Procedure

Pumping Water

Facility:	Written By:	Approved By:	Date Created	Date of Last Revision:

Hazards Present:	PPE or Devices Required:	Additional Training Required:
Slip/Trip Tool damage	Steel toed boots Eye protection Hand protection	

Safe Work Procedure:
<ol style="list-style-type: none"> 1 Place pump on level ground 2 String out hoses for discharge - make sure all bends and knots are out 3 Hook hose to pump and attach suction - make sure end of hose screen is in deep water 4 Service pump and prime the pump 5 Use cold start procedure and run the pump (do not run pump when it is empty) 6 Check on pump periodically to ensure it is not plugged or running out of water 7 After job is finished, roll up discharge hose, making sure it is completely empty 8 Remove suction line and put all hoses on to truck - empty pump of water and load 9 Make sure load is secured

If an emergency situation occurs while conducting this task, or there is an equipment malfunction, engage the emergency stop and follow the lock out procedure
