

Learn how to create a safety committee (and work towards your certification) at the Westman Safety Conference

The Westman Safety Conference is returning to Brandon, MB, on April 18 & 19, 2018, with an assortment of two-, one- and half-day courses that speak to the needs of **all** industries.

Our half-day course, *Safety Committee Basics*, provides you with the knowledge and tools to set up and maintain an effective safety and health committee or worker representative. Participants will learn the purpose of a committee or representative, the legal duties of the committee or representative, the basic principles of recognizing, assessing and controlling hazards, and understanding of what happens if an incident still occurs.

Derek Pott, Operations Manager with the Construction Safety Association of Manitoba, says that this course educates workers on their roles and responsibilities and equips them with the tools needed to meet their obligations.

"Participants will learn about the make-up of a safety committee and each individual's role, responsibilities and obligations in that committee," says Pott. "Safety committees are a key source of communication in a workplace and we're here to educate you about the building blocks that will make a committee proactive and effective in the workplace."

Safety Committee Basics is a half-day course offered on April 18, 2018. Seating for this course is limited - to register, visit www.westmansafety.ca.

Safety Committee Basics can also be applied towards your certification in COR™, SECOR™ and SAFE Work Certification. To learn more about the other requirements for these certification programs, visit www.constructionsafety.ca.

If you're interested in this course, you might also be interested in *Safety Essentials for Leaders / Leadership for Safety Excellence, Hazard Identification & Risk Control* and *Principles of Safety & Health Management* - all offered at the 2018 Westman Safety Conference!

To inquire about the Westman Safety Conference and all that it has to offer, visit westmansafety.ca or contact us at conference@westmansafety.ca.

WORKING TOWARDS SAFE WORK CERTIFICATION OR COR™/SECOR™?

The Construction Safety Association of Manitoba (CSAM) is an official partner of SAFE Work Manitoba and its SAFE Work Certified program.

SAFE Work Certified is offered through industry-based safety programs – Made Safe, RPM Trucking Industry Safety, Motor Vehicle Safety Association of Manitoba, and Farm Safety Program – to help reduce workplace injuries and promote a safety culture in Manitoba.

Select courses - Safety Committee Basics, Safety Essentials for Leaders / Leadership for Safety Excellence and Principles of Safety & Health Management - offered at the Westman Safety Conference can be accepted towards your certification.

To learn more about COR™, SECOR™ and SAFE Work Certification, visit www.constructionsafety.ca.
