

WHMIS 2015/GHS Quiz

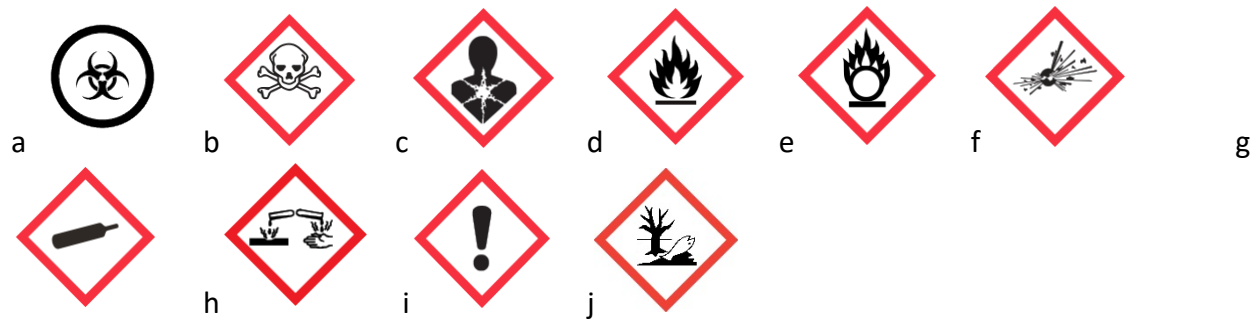

Name _____

Date _____

1. Supplier Labels are placed on the hazardous material containers by the chemical manufacturer, importer, or distributor.
True____ False____
2. Workplace labels are placed on the controlled product by the supplier
True____ False____
3. Under WHMIS2015/GHS a workplace label **IS** required when a supplier label becomes lost or illegible.
True____ False____
4. Under WHMIS2015/GHS each classification is divided into one or more categories to indicate the severity of the hazard.
True____ False____
5. The classification of products under WHMIS2015/GHS is the responsibility of the employer:
True____ False____
6. Under the WHMIS2015/GHS classification system, there are two major hazard groups.
True____ False____
7. Safety Data Sheets must accompany all controlled products used or produced in the workplace and be readily available to workers.
True____ False____
8. Acute Toxicity is a class under the Physical Hazard group.
True____ False____
9. Under WHMIS2015/GHS a workplace label is **NOT** required when a hazardous product is transferred from a labeled container to a portable container that is intended for immediate use.
True____ False____
10. It is the responsibility of the _____ to ensure all workers who handle or are otherwise exposed to controlled products are adequately trained.
11. Section ____ and section ____ of the Safety Data Sheet contains all the required information for a WHMIS label.

12. The lower the LD50 value, the _____ the toxicity.
13. When determining control measures for identified hazards, the three main areas to consider are, at the _____, along the _____ and at the _____ .
14. Safety Data Sheets (SDSs) have _____ sections.
- A. 9 sections
 - B. 3 sections
 - C. 16 sections
 - D. 15 sections
15. Which label contains 6 mandatory pieces of information?
- A. Supplier label
 - B. Workplace label
 - C. Household label
 - D. Employer label
16. What information will you find on a SDS?
- A. Firefighting measures
 - B. First aid measures
 - C. Ecological information
 - D. All of the above
17. The three requirements of a workplace label are:
- A. Product Name, PPE requirements, Reference to SDS
 - B. Product Name, Safe Handling Information, Reference to SDS
 - C. Product Name, Symbols/Pictograms, Emergency Contact
 - D. Product Name, Signal Word, Symbols/Pictograms
18. Skin burns, eye damage, and the destruction of metals can be caused by?
- A. Corrosives
 - B. Oxidizers
 - C. Compressed Gases
 - D. None of the above

19. Match the WHMIS 2015 hazard pictogram with the correct category below:

- _____ Flammables (gases, aerosols, liquids, solids); Pyrophoric (liquids, solids, gases); Self-reactive substances and mixtures; Self-heating substances and mixtures; Substances and mixtures which, in contact with water, emit flammable gases, organic peroxides
- _____ Oxidizing (liquids, solids, gases)
- _____ Gases under pressure
- _____ Carcinogenicity; Germ cell mutagenicity; respiratory sensitization; reproductive toxicity; Specific target organ toxicity – single exposure; Specific target organ toxicity – repeated exposure; Aspiration hazard
- _____ Corrosive to metals; Skin corrosion; Serious eye damage
- _____ Self-reactive substances and mixtures, Organic peroxides
- _____ Acute toxicity (oral, dermal, inhalation; fatal or toxic)
- _____ Acute toxicity (harmful); Skin irritation; Eye irritation; Skin sensitization; Specific target organ toxicity – single exposure (respiratory irritation or drowsiness or dizziness)
- _____ Biohazardous infectious materials
- _____ Environmental Hazards
