TOP THREE INJURIES

40112 INSTALLING CASE GOODS & FIXTURES

Installing Case Goods & Fixtures is the 14th largest classification representing just over 1% of levied payroll assigned to CSAM. The classification saw significant payroll growth in 2018 to 2019, at approximately 18%.

Very little of the payroll within the classification is COR[®] Certified at just under 15%. The classification currently resides in the 125% Risk Category although has shown recent signs suggesting that the 150% Risk Category may be more appropriate.

In 2019, the classification had a total of 2 Severe Injuries of which 50% (1) occurred in a work environment that was NOT safety certified. There has been considerable improvement over the previous year given there were 4 Severe Injuries and factoring in the 18% payroll growth.

This classification has the second lowest certification percentage of all classifications perhaps suggesting it may be worthwhile exploring this further once the employer identification indicator in Compass has been enhanced.
