## 40602 INSTALLING ELEVATORS

This Classification is very small ranked 17th amongst the CSAM Classifications. It represents less than 1% of overall payroll.

It has the distinction of having the lowest Risk Category at 60% amongst all construction Classifications. There is approximately 25 active employers assigned to the Classification, however, given that over 95% of the Classification is safety certified, this would suggest that there are perhaps a few employers doing the vast majority of work within this industry.

In 2018 the Classification had (1) Severe Injury and zero in 2019. There has not been any time loss claims reported in 2019 or 2020 to-date.

There is basically no reference point for drivers of claim incidents within the industry.

This Classification should continue to drop Risk Categories given the dynamics within the New Rate Model, however, there may be some hesitancy given overall payroll is less than \$15M.

## Sub-Group 406-02, Installing Elevators Industry Sector 4: Construction
