THE INJURY

Open wounds  
Other traumatic  
injuries  
Surface wounds,  
bruises

BODY PART  
INJURED

Fingers  
Ankles  
Hands

## 40603 INSTALLING HEAVY MACHINERY

Installing Heavy Machinery is the 12th largest classification with payroll close to the \$30M range. In 2019, approximately 45% of the payroll was safety certified.

This classification currently resides in the 200% Risk Category, however, has shown signs of trending towards the 250% Risk Category.

In 2019, there was a significant drop in Severe Injuries (3) compared to the previous year of (8). Time loss claims also dropped dramatically from (23) in 2018 to (10) in 2019. The payroll has remained steady so the dramatic drop cannot be explained away by a drop in exposure hours.

Please refer to the cover page data to identify the cause and types of injuries sustained within this classification.
